Complete Bulk Material Handling Solutions

Since 1988

ROLLWELL
CONVEYOR PRIVATE LIMITED

Conveying Performance

ROLLWELL, established in 1988, is a leader in the supply of Bulk Material Handling Equipment. We recently changed our name and management team to better symbolize our extensive product range and improved service quality with additional capacity.

As one of India's leading manufacturers of Complete Conveyors and Components like Rollers, Pulleys, and Frames, our expertise lies in the design and supply of all types of Bulk Material Handling Equipment.

Our Product Range

We offer a comprehensive array of Bulk Material Handling Solutions, including:

- Complete Belt Conveyors
- Conveyor Components: Rollers, Idlers, Frames, Brackets & Pulleys
- Pipe Conveyors: Panels, Brackets & Rollers
- Conveyor Safety: Conveyor Side Guards and Hand Rails
- Specialized Conveyors:
- High Angle Conveyors
- Screw Conveyors
- Shuttle Conveyors
- Tripper Conveyors
- Roller Conveyors
- OLBC
- High Speed & Long-Distance Conveyors
- Gates & Valves: Various Types of Gates & Valves, including Flap gates, Diverter Gates, Rack & Pinion Gates, etc.
- General Industrial Fabrication
- Other Allied Equipment
- Complete Packing & Logistics Plant for Powder Handling

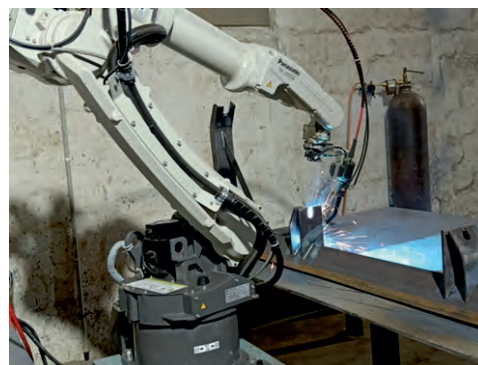

Manufacturing Strength

Our USP lies in our state-of-the-art manufacturing facility spread over

15 acres, enabling large and consistent capacity:

- Rollers: 2,000 units per day
- Idler Frames: 400 units per day
- Pulleys: 30 units per day
- Fabrication: Up to 400 tonnes per month

We can scale up production to meet your specific requirements. Our facility utilizes

Quality & Durability

We are renowned for our quality painting and packing, alongside state-of-the-art engineering in roller manufacturing. Our rollers are specially engineered for challenging environments like dusty, rainy, and high-impact conditions. The roller design and sealing system are top-tier and guaranteed for 50,000 hours.

Our Valued Customers

ROLLWELL has supplied to almost all sectors and major industries across India and also exports to several countries globally. We uphold good business practices not only with our customers but also with our suppliers, ensuring regular volume orders and prompt & immediate payments for supplies.

Our Equipments

Pipe Conveyors

Our Pipe Conveyors offer an enclosed and environmentally friendly solution for bulk material transport, preventing spillage and dust emission while navigating tight curves and varying terrains.

Belt Conveyors

We provide complete Belt Conveyors, a versatile and efficient solution for transporting a wide range of bulk materials over various distances and inclines.

Roller Conveyors

Ideal for handling individual items or flat bottomed bulk containers, our Roller Conveyors offer a robust and reliable solution for internal logistics and assembly lines.

Chain Plate Conveyors

Our Chain Plate Conveyors are engineered for heavy-duty applications, providing durable and reliable transport for hot, abrasive, or bulky materials.

Our Equipments

Shuttle Conveyors

Our Shuttle Conveyors provide flexible material distribution, allowing for precise discharge at multiple points along a linear path, optimizing storage and loading operations.

Travelling Tripper

Designed for uniform material distribution, Tripper Conveyors enable selective discharge along the length of a belt conveyor, efficiently filling bunkers or stockpiles.

Screw Conveyors

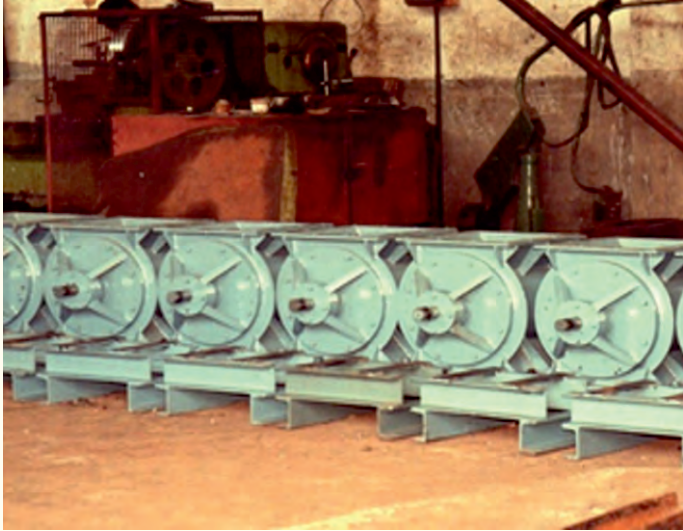

Perfect for conveying granular or powdery materials, our Screw Conveyors offer a compact and enclosed system for controlled and consistent material flow.

Belt Feeder

We manufacture belt feeder for bulk material handling from 500 BW upto 2400 BW

Our Equipments

Rotary Air Lock Valve

Belt weigh Feeder

Types of Valves/Gates

Stacker Conveyor

High Angle Conveyor

Gas Lock Valves

Our Components

Conveyor Idler/Rollers

Conveyor Pulleys

Spiral Rollers

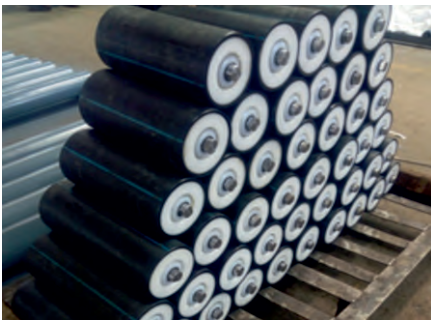

Deflector Pulleys

Stringers and Supports

Conical Rollers

Polymer Rollers

Impact Pads

Skirt Sealing System

Guide Rollers

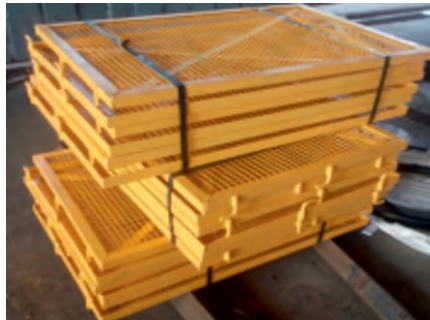

Belt Guide Conical Rollers

Garland Rollers

Hand Rails

Conveyor Guards

Belt Hoods

- 
- We manufacture conveyor pulleys ranging from Ø220 mm to Ø2000 mm diameter, suitable for belt widths up to 2400 mm. Our pulleys are designed to operate at belt speeds up to 8 meters per second and are capable of handling conveyor system capacities up to 10,000 TPH (tons per hour). To ensure optimal grip, reduced slippage, and extended service life, we offer all major lagging types including Chevron, Herringbone, Diamond, as well as Ceramic lagging, suitable for high-tension and demanding bulk material handling applications
 - We manufacture conveyor rollers in the range of Ø42 mm to Ø193 mm diameter, suitable for belt widths up to 2400 mm. Our rollers are designed to operate at belt speeds up to 8 mtr/second and are capable of supporting high-capacity conveyor systems handling up to 10,000 TPH. Engineered with precision machining and robust sealing systems, our rollers ensure smooth operation, low vibration, and extended service life even in demanding bulk material handling applications.

Conveying Excellence Across the Globe

ROLLWELL has supplied to almost all sectors and major industries in the country and also exports to several countries globally. ROLLWELL follows good business practices not only with its customers, but also with its all suppliers with regular volume orders and prompt & immediate payments for supplies.
